

CPAN 214 – High Level Programming Languages Lab 3

Task: Max and min number from user

1. Create an empty list named nums to store user input
2. Request user input to get a number or list of numbers
3. Insert number or list of numbers into the nums list
4. Ask input from user if they would like to enter another number, if yes get input
5. After user has entered all numbers, use a loop to iterate over numbers entered
6. Determine largest and smallest number entered by user
7. Display list of numbers entered, max number, and minimum number to user

Weight: 6% of final grade

Rubric	WEIGHTAGE
Variables	20
User input and output	20
Decision structures	20
Operations	20
Loops	20
TOTAL	100
